

BRAND IDENTITY GUIDELINES

GENESIS PURE LIFESCIENCES

Version 1.0 | October 2026

SECTION 01

Logo concept & design rationale

This page describes what the approved artwork depicts. Each numbered element below corresponds to a marker on the logo.

1 **Stylised G of flowing ribbons**
The primary mark is a letter G formed from two flowing, leaf-like ribbons that blend from blue to green.

2 **Capsule**
A blue-and-white capsule sits within the opening of the G, identifying the company as pharmaceutical.

3 **Molecular nodes**
Two linked spheres extend from the upper ribbon and refer to molecular science.

4 **Capsule I with sprout**
In the wordmark, the I of GENESIS is a capsule topped with a green sprout, repeating the capsule theme and adding a growth cue.

DESIGN RATIONALE

Together, the capsule, molecule and sprout place the brand between medicine, science and growth. The blue-green palette and organic ribbon forms give the mark a fresh, clean character that supports the word *Pure* in the company name.

Rationale is drawn from the elements visible in the approved artwork and can be refined by the client.

SECTION 02

Primary logo

The full-colour logo on white is the preferred version for all applications. It combines the symbol, the GENESIS wordmark and the PURE LIFESCIENCES descriptor as a single locked artwork.

Primary full-colour logo on white

Use the supplied artwork only. Do not redraw, retype or rearrange any part of it.

SECTION 03

Colour palette

The palette is taken directly from the approved logo artwork. Values are sampled from the artwork file; CMYK is a mathematical conversion from RGB.

Deep Blue

HEX #087ECD
RGB 8 126 205
CMYK 96 39 0 20

Primary. Capsule cap, lower ribbon edges, symbol depth.

Sky Blue

HEX #20A7DB
RGB 32 167 219
CMYK 85 24 0 14

Primary. Molecular nodes, upper ribbon, capsule highlights.

Leaf Green

HEX #41B183
RGB 65 177 131
CMYK 63 0 26 31

Primary. Mid-tone where the ribbon turns from blue to green.

Fresh Lime

HEX #9BD96B
RGB 155 217 107
CMYK 29 0 51 15

Accent. Light end of the green ribbon, sprout leaves.

Slate

HEX #50606E
RGB 80 96 110
CMYK 27 13 0 57

Wordmark. Used for the GENESIS lettering.

Charcoal

HEX #202020
RGB 32 32 32
CMYK 0 0 0 87

Descriptor. Used for the PURE LIFESCIENCES line.

SYMBOL GRADIENT

The symbol moves from Deep Blue through Sky Blue and Leaf Green to Fresh Lime. Reproduce it from the supplied artwork rather than rebuilding the gradient.

SECTION 04

Typography

The wordmark is supplied as finished lettering in the approved artwork. It must be reproduced from that artwork and never retyped.

WORDMARK

GENESIS

Uppercase geometric sans-serif lettering with even stroke weight (medium weight as drawn), colour Slate #50606E. The G is a custom swirl and the I is the capsule with sprout.

DESCRIPTOR

PURE LIFESCIENCES

Uppercase geometric sans-serif, light weight as drawn, wide letter-spacing, colour Charcoal #202020.

TYPEFACE NAME

To be confirmed

The font family and exact weights were not supplied with the approved artwork, so no font name is stated here. Please provide them from the original design file.

SUPPORTING TYPEFACE

To be specified

No supporting typeface has been approved yet. It should be added once the brand owner confirms it.

Type used inside this guideline document is Helvetica. It is a layout font for this document only and is not a brand typeface.

SECTION 05

Logo variations

Use full colour wherever possible. Use the one-colour versions only when colour printing or contrast makes full colour impractical.

Full colour on white

Black one colour on light

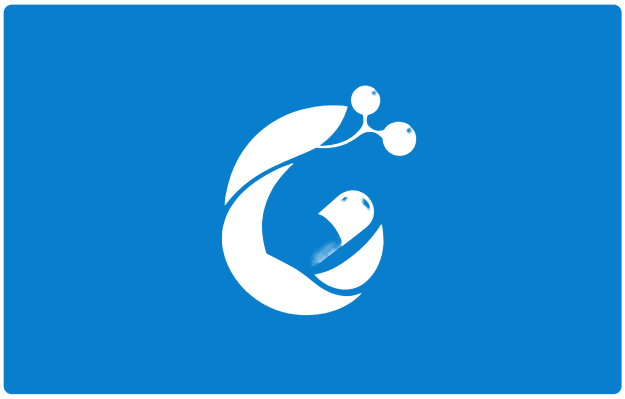

White (reversed) on Deep Blue

Symbol only full colour on white

Symbol black one colour on light

Symbol white reversed on Deep Blue

One-colour and reversed versions are derived from the approved full-colour artwork. For print production, replace them with the master vector files when available.

SECTION 06

Clear space & minimum size

Keep a protective margin free of text, images and edges so the logo stays clear and prominent.

Clear space
The clear space on every side equals **x**, the cap height of the GENESIS lettering in the logo.

MINIMUM SIZE

Full logo
Print: 30 mm wide
Screen: 120 px wide

Symbol only
Print: 12 mm wide
Screen: 48 px wide

Clear-space and minimum-size values are proposed guideline rules for client approval.

SECTION 07

Correct & incorrect usage

The logo must always appear as supplied. The examples below show approved use and the most common errors to avoid.

CORRECT

On white

Reversed on Deep Blue

Symbol alone, where space is limited

INCORRECT

Do not stretch or squash the logo.

Do not rotate or tilt the logo.

Do not change the logo colours.

Do not add shadows or effects.

Do not place the full-colour logo on a busy or low-contrast background.

Do not retype the wordmark in another font.

SECTION 08

Logo placement examples

Sample layouts show correct logo position and scale. Contact details are placeholders only.

VISITING CARD

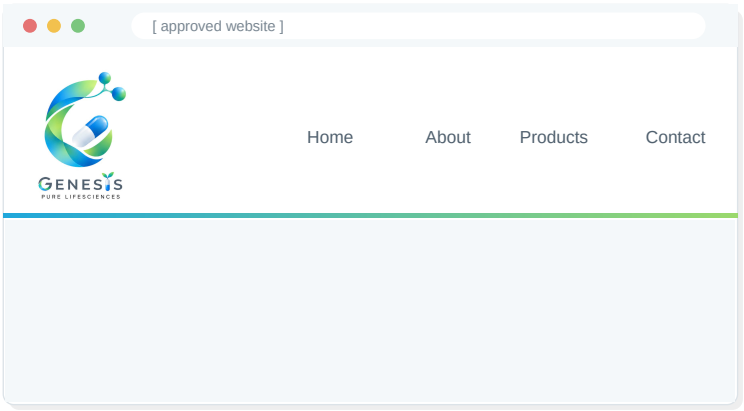

Front and back, 90 x 55 mm

LETTERHEAD

A4 (210 x 297 mm), logo top left

WEBSITE HEADER

Logo left-aligned on white header bar
